Software Engineer | Real-Time Financial Systems | Cloud | Data Engineering

Innovative and impact-driven Software Engineer with 8+ years of experience architecting high-performance, financial-grade backend systems and real-time data pipelines across tolling, fintech, and SaaS domains. Proven track record of building mission-critical applications that move millions in revenue, leveraging .NET Core, Go, Python, Kafka, Kubernetes, SQL Server, Redis, and BigQuery and cloud platforms like Azure and GCP. Expert in designing scalable microservices, implementing event-driven systems, and optimizing big data workflows for speed and accuracy. Adept at transforming complex business requirements into secure, reliable, and measurable engineering outcomes. Passionate about building the infrastructure behind smart decisions, financial insights, and real-time platforms that power economies

Work Experience

Software Engineer Team Lead

December 2024 – Present

E470 Public Highway Authority

- Led end-to-end development of a .NET Core-based payment platform integrated with third-party gateways, reducing failed transactions by 30% and increasing revenue collection accuracy.
- Modernized toll transaction POS systems using .NET 8, Redis caching, and Blazor, improving processing latency and customer responsiveness.
- Designed real-time tolling workflows with Azure Event Grid, Kafka, and Pub/Sub, scaling to support 1M+ daily transactions.
- Authored technical architecture docs and mentored team in best practices, including SOLID principles and secure coding standards.
- Spearheaded CI/CD pipelines in Azure DevOps and GitHub Actions, ensuring resilient deployment of financial services.

Full Stack Software Engineer

December 2022 – December 2024

E470 Public Highway Authority

- Developed .NET 8-based APIs for fleet/rental account monetization, handling millions in toll billing data with SQL Server and Entity Framework.
- Built automation scripts using C# and MS SQL jobs to process billing events, improving operational efficiency across departments.
- Streamlined ETL pipelines for large transaction datasets via SSIS and Azure Data Factory, cutting monthly processing time in half.
- Created notification systems using SendGrid, Azure Service Bus, and console apps, minimizing missed payments and improving customer engagement.
- Migrated systems to Azure using Terraform and Kubernetes, accelerating deployments and compliance.

Continued to the Next Page..

Software Engineer
Vettx Inc.

February 2022 – October 2022

- Built a CRM platform for car dealerships (200+ clients), integrated with DRAIVER, CDK, Carfax APIs; supported real-time vehicle lead decisions using Pub/Sub and BigQuery.
- Created and deployed scalable tools for lead scraping and alerting using Google Cloud Functions, boosting sales conversions by 35%.
- Led CI/CD automation via Cloud Build, cutting deployment time by 75%.

Software Engineer
InvestorKeep Inc.

February 2021 – December 2021

- Developed a financial portfolio management platform for 1M+ customers, with C++ algorithms enhancing performance and portfolio ROI by 15%.
- Built analytics and data visualization tools using Mixpanel, Prometheus, and Kibana, giving real-time insights to stakeholders.
- Created microservices in Go and optimized Angular apps for performance using lazy loading and OnPush detection.

Associate Software Engineer
FIGmd Inc.

October 2016– July 2019

- Designed and maintained ETL pipelines and DataMart solutions for U.S. healthcare registries.
- Ensured high-quality data ingestion, transformation, and storage for regulatory compliance and reporting.
- Reduced data load times by 50% through performance tuning and indexing.

Core Skills

Financial Systems: Payment Gateways, POS Systems, Data Reconciliation, Portfolio Management

Programming: C#, TypeScript, JavaScript, Python, Go, C++, Java, .NET (Core & Framework), ASP.NET, gRPC, GraphQL, Microservices Architecture, Event-Driven Architecture, Domain Driven Design, WebSockets

Web: Angular, Angular Material, RxJS, NgRx, Blazor, Next.js, TypeScript, HTML5, CSS3, Tailwind CSS, Bootstrap

DevOps & Cloud: Cloud Run, Cloud Functions, Pub/Sub, Firestore, BigQuery, Cloud SQL, GKE (Google Kubernetes

CI/CD & Containerization: Docker, Kubernetes, GitHub Actions, Jenkins, Terraform, Ansible, GitLab CI/CD, Cloud Build

Databases: MS SQL, MySQL, PostgreSQL, MongoDB, Redis, Elasticsearch, Cosmos DB, Firestore, BigQuery, Cloud SQL

Relational & NoSQL: MS SQL, MySQL, PostgreSQL, MongoDB, Redis, Elasticsearch, Cosmos DB

Testing & Automation: Cypress, Selenium, XUnit, Postman, NUnit, Mocha, Jest, Test-Driven Development (TDD), Integration Testing, Performance Testing

ETL & Data Processing: SSIS, Pandas, NumPy, Apache Spark, Apache Kafka, Airflow, Data Lake, Data Warehousing

Version Control: GIT, GitLab, GitHub, TFS, GitHub Actions, Bitbucket

Other Tools & Technologies: Twilio, Mixpanel (Analytics), Kibana (Visualization), Prometheus

Education

Master of Science in Computer Science: California State University, Chico

August 2019 – December 2021

Bachelor of Engineering in Computer Engineering: Mumbai University

August 2012 – May 2016
